

Kinetico Incorporated Fact Sheet

Profile

Kinetico is one of the world's leading manufacturers of water treatment products for residential and commercial markets. Kinetico designs systems to improve water quality for general use and systems that further refine water to high quality standards for consumption.

Kinetico's home water treatment systems provide customized solutions to combat a variety of water problems homeowners frequently encounter. Whether individuals seek filtered water, softened water or a combination of both, Kinetico's home water treatment systems provide logical solutions. Kinetico is best known for pioneering the development of water treatment systems that are powered by the energy of moving water, not electricity. Kinetico also offers a line of products to improve drinking water quality, including reverse osmosis systems which are acknowledged by both the Centers for Disease Control and the Environmental Protection Agency as being very effective in removing contaminants that could be in residential drinking water. The Kinetico K5 Drinking Water Station is a reverse osmosis system that can adapt to a homeowner's changing water conditions and needs to ensure the highest quality drinking water—today and in the future.

History

Kinetico Incorporated was founded in 1970 by two engineers who pioneered the development of non-electric, fully automatic water treatment systems. Evolving from the Tangent Company, a small consulting design firm, Kinetico soon became a global leader in the water treatment industry. Over the years, through the dedication of its founders, employees and distribution network of independent dealers and distributors in nearly 100 countries, Kinetico experienced tremendous success. The company grew from a two-man, creative undertaking into a strong and dynamic organization.

In April of 2006, Kinetico was acquired by Axel Johnson Inc., the North American operating arm of the Sweden-based Axel Johnson Group. Axel Johnson is a private company with interests in the energy and environmental sectors that shares the vision and core principles upon which Kinetico was founded.

Residential/Commercial Products

- Water softeners
- Drinking water systems (reverse osmosis)
- Carbon filters
- Backwashing filters
- Aeration systems
- Iron filters
- Neutralizers
- Scale reduction systems
- Combination filters/softeners
- Dechlorination systems

Distribution

International network of independent, authorized dealers and distributors serving the United States and nearly 100 other countries around the world.
